

LeadStreak AI

"Turn your side-hustle outreach into unbreakable habits with crypto staking and social accountability."

The Accountability Problem

Consistency Challenge

70% of people miss their daily outreach targets within the first month of setting them

Habit Breakdown

Without external accountability, even the best intentions fade within days

Revenue Impact

Missed outreach = missed opportunities = lost income potential every single day

Traditional task managers don't create real consequences for failure. No skin in the game means no real commitment.

The Solution: Stake to Stay Committed

Set Your Task

Define daily outreach goals: calls, emails, meetings to book

Stake Crypto

Lock up USDC or SOL as commitment collateral

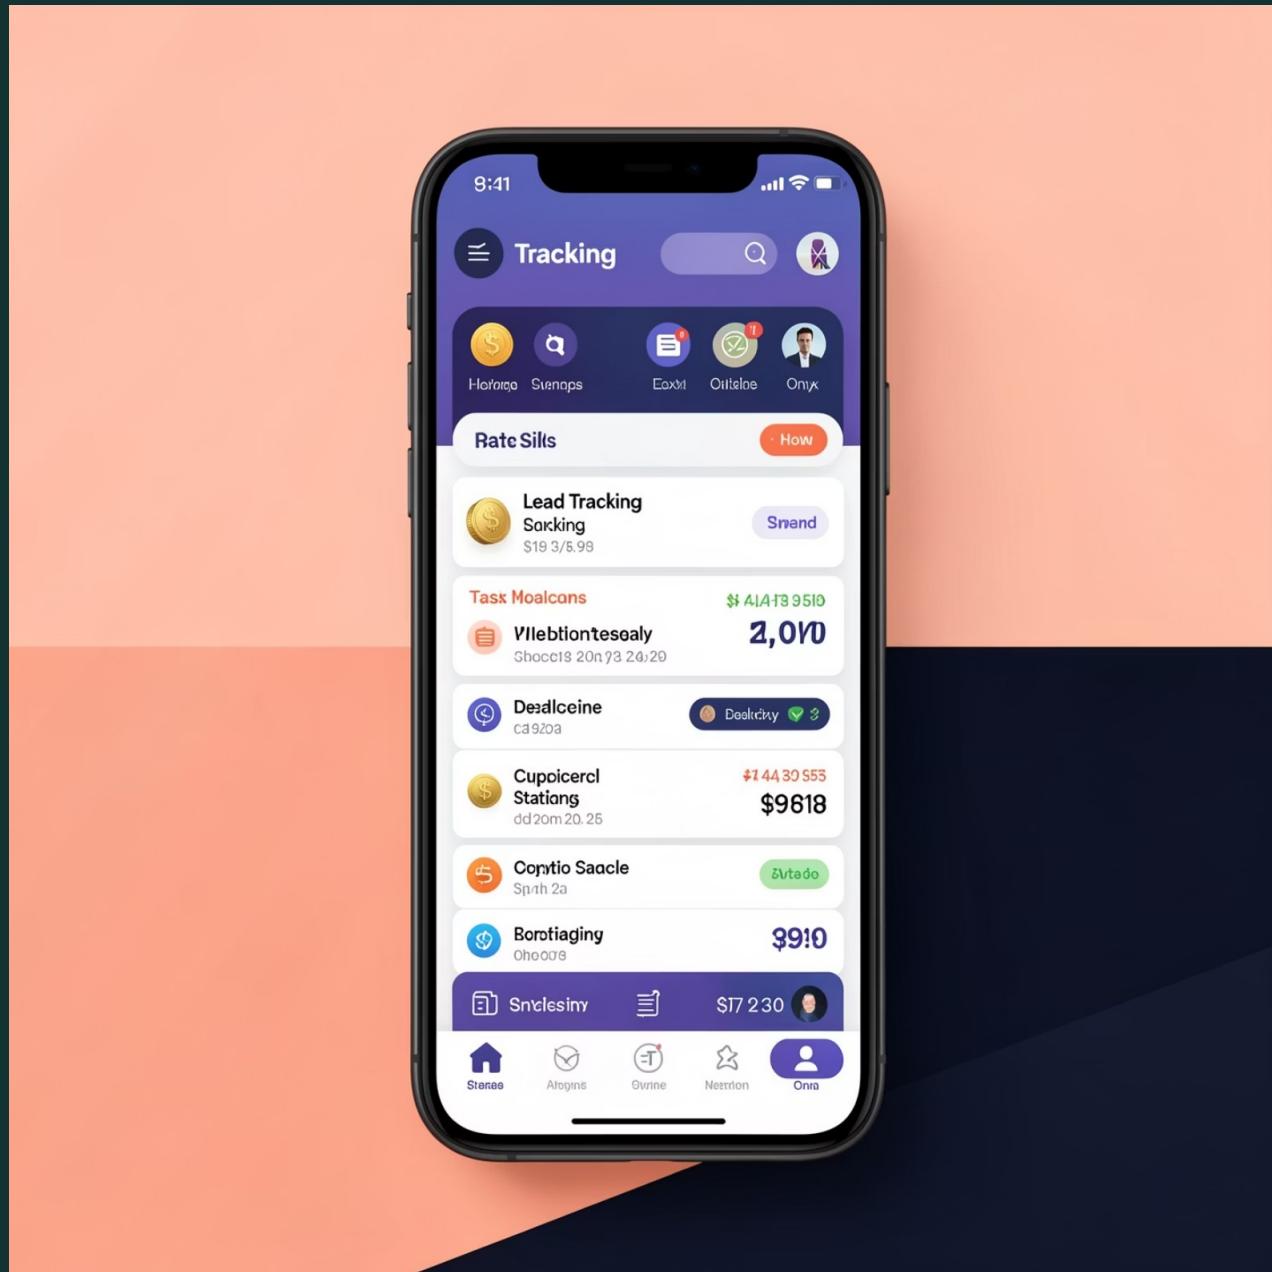

Complete & Earn

Finish tasks, verify proof, get your stake back plus streak rewards

Your money is your motivation. Fail to complete tasks? Your stake goes to your accountability group. Complete consistently? Your crypto returns with pride—and streak bonuses.

How LeadStreak Works

Video demo: See the app in action—from setting tasks to staking crypto to verifying completion.

- Connect your CRM and calendar
- Set daily outreach targets
- Stake crypto per task
- Upload proof of completion
- Earn streak multipliers

Why LeadStreak Wins

Real Skin in the Game

Crypto stakes create actual financial consequences—not just guilt

Social Accountability

Your circle watches, supports, and benefits from your success—or claims your stake if you fail

AI-Powered Insights

Smart task suggestions, lead prioritization, and generation
